

MEGA VAC-PAD

PART NUMBER: D110MEG

The Mega Vac-Pad is designed to accept large magnetic drills with drilling capacity up to 200mm dia. holes into all types of steel including non-ferrous material.

- Requires compressed air pressure (minimum 450kPa (70 PSI)).
- Covers a complete range of larger magnetic drilling machines
- Allows smaller machines to drill in multiple positions without moving fixture.
- This unit has a holding power of 820kgs with air pressure supplied to the vacuum generator of 450kpa+
- Gives full stability due to the stabilizing feet incorporated
- Steel plate size 345 x 250mm Weight: 11.2kgs

NOTE: MAGNETIC DRILL NOT INCLUDED

Suitable for large magnetic machines
