

VAC-PAD WITH DRILLING MAST AND REAR STAY

PART NUMBER: D110SL

The Vac-Pad with drill mast can be used in several ways and now with the battery drill spindle kit attachments, makes it more portable and able to do larger holes.

- Requires compressed air pressure (minimum 450kPa (70 PSI)).
- This unit has a holding power of 320kgs with air pressure supplied to the vacuum generator of 450kpa+
- Gives full stability due to the stabilizing feet incorporated and can lock on to checker plate, un-even surfaces (such as concrete so that core and hammer drills can be used)
- With the new mounting for air drill attachment with “U” bolts, it is possible to fir larger air drill if required (for oil rig work)

NOTE: AIR DRILL AND ARBOUR NOT INCLUDED
